

Please read the comments carefully. Rubric:

1. Introduction:

1. Hypothesis & motivation is properly defined
2. In-text citation presence

if any of these are missing then there is the penalty of marks. Additionally how well they have given literature background.

2. Methods: marked on the basis:

1. If all experimental conditions are clearly explained
2. Figures referred to in the text.
3. Some students have not added figures

3. Results:

1. If the figure is present
2. If the figure is referred to in the text with proper reference to variables
3. Experimental conditions are referred to properly & clearly

4. Discussion

1. In-text citations present
2. The description is not generalized and abstract

5. Your take --> if you have attempted

1. Not generalized statement like the study is useful and enhances our understanding, and can have future implication
